

Ink Compatibility Statement

21 March 2019

We strive to innovate and simplify for the benefit of the market. To this end, the Clear Focus dual layer liner, also known as Universal Liner, allows the films to be printed in a wide variety of printers and ink systems. Please refer to the table below listing which inks are compatible for each of our films.

Product	Solvent	Eco/mild Solvent	Latex	UV Cure	Screen Print	Thermal Transfer	Electrostatic Transfer	Airbrush	Aqueous	Notes
AutoVue (Universal Liner)	✓	✓	✓	✓	✓					
AutoVue SL	✓	✓	✓		✓					
BannerVue SL	✓	✓	✓							
ClassicVue SL	✓	✓	✓		✓	✓	✓	✓		If painted, do not use paint thinners
ClearVue Interior	✓	✓		✓	✓					
EconoVue	✓	✓	✓	✓	✓					
ExitVue SL	✓	✓	✓							
Fast One Way	✓	✓		✓						
JetVue									✓	
PromoVue (Universal Liner)	✓	✓	✓	✓	✓					
PromoVue SL	✓	✓	✓		✓					
PosterVue	✓	✓	☞		✓	✓	✓	✓		For Latex, may not detect media position, run at lowest possible temperatures, use take up roller
RetailVue SL	✓	✓	✓							
SuperVue	✓	✓		✓	✓	✓	✓	✓		If painted, do not use paint thinners
SunSecure										Cannot be printed
CurvaLam										Cannot be printed

Notes

- IMPORTANT:** Performing a test prior to actual production can minimise costly errors and help to ensure the success of your project.
- We recommend that quality RIP software is used and configured. Test an appropriate profile for your environment and machine to be compatible to our films.
- Lower the heat settings and monitor while printing. Stop printing immediately if film starts to curl along the edges.
- Always use a take up roller on any type of printer. Have the printed graphics wind outwards on the take up roll.
